

We design  
**High Identified Flying Objects**  
Livery Design & Marketing Services for Aircraft & Jet operators

The Gulfstream 650 Liveries by The Flying Designers

**Imagine yours, we'll create it.**

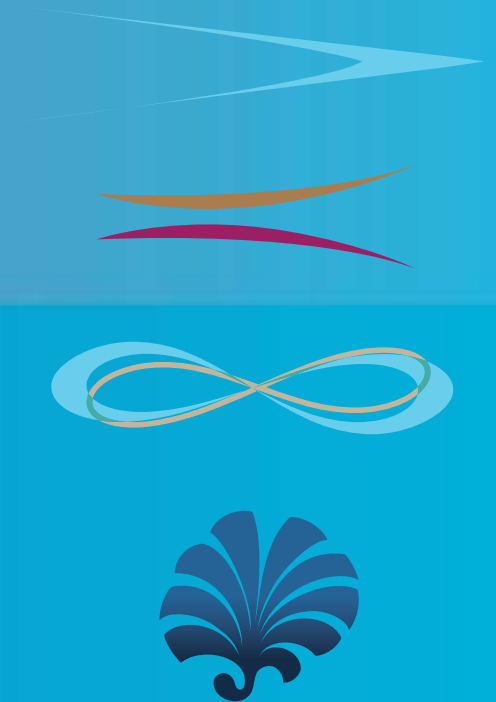

# Gulfstream 650

With the G650, proving that aircraft is much more than a simple means of transport is easy:  
speed, privacy, distinctness and a touch of glamour.

These features built our creative roadmap when we started the modeling study for this brilliant upcoming (2012) king of air.

**Our task is to delivery the best on-measure liveries for Jet owners & companies:  
take a peek at the 4 following H/I/F/O® concepts,  
then imagine yours, we'll create it.**

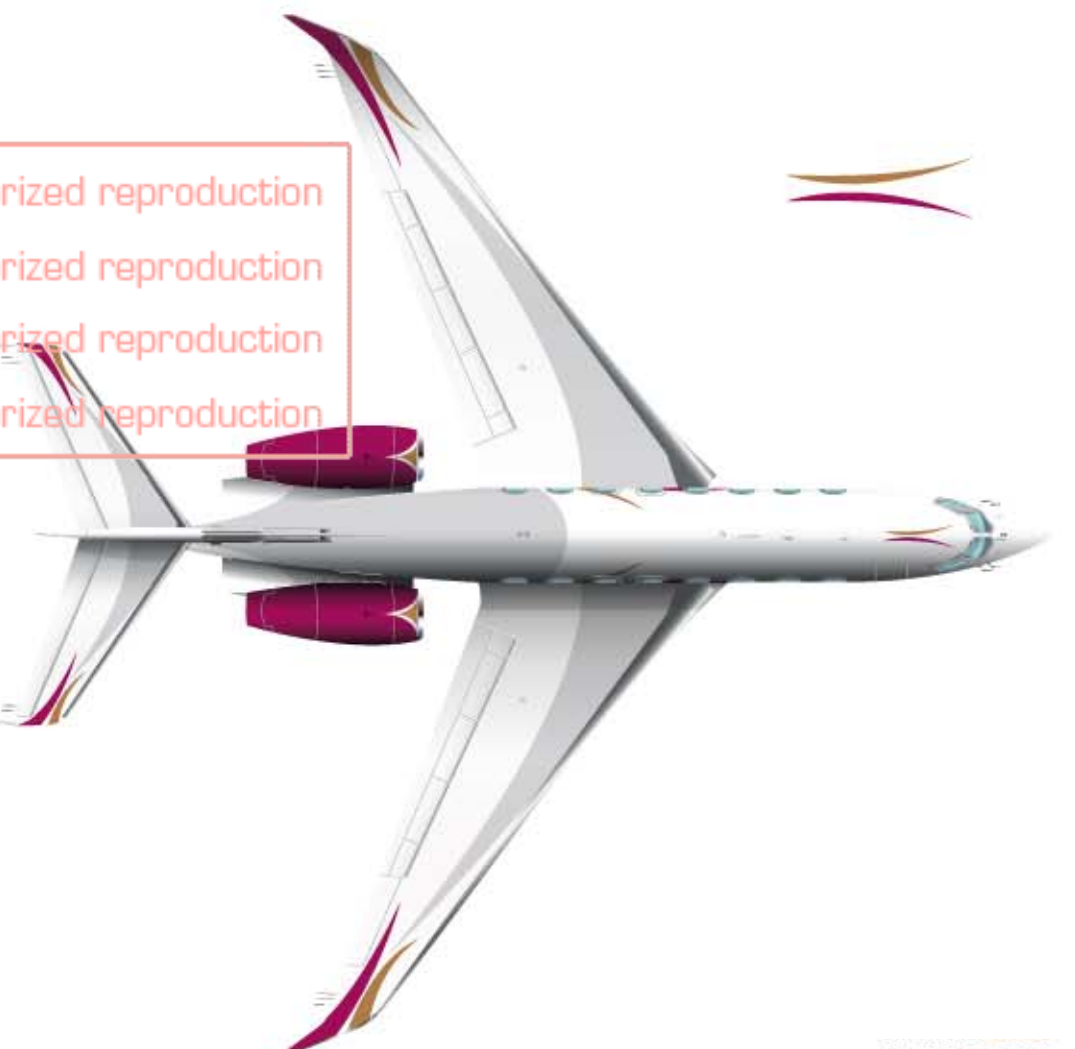

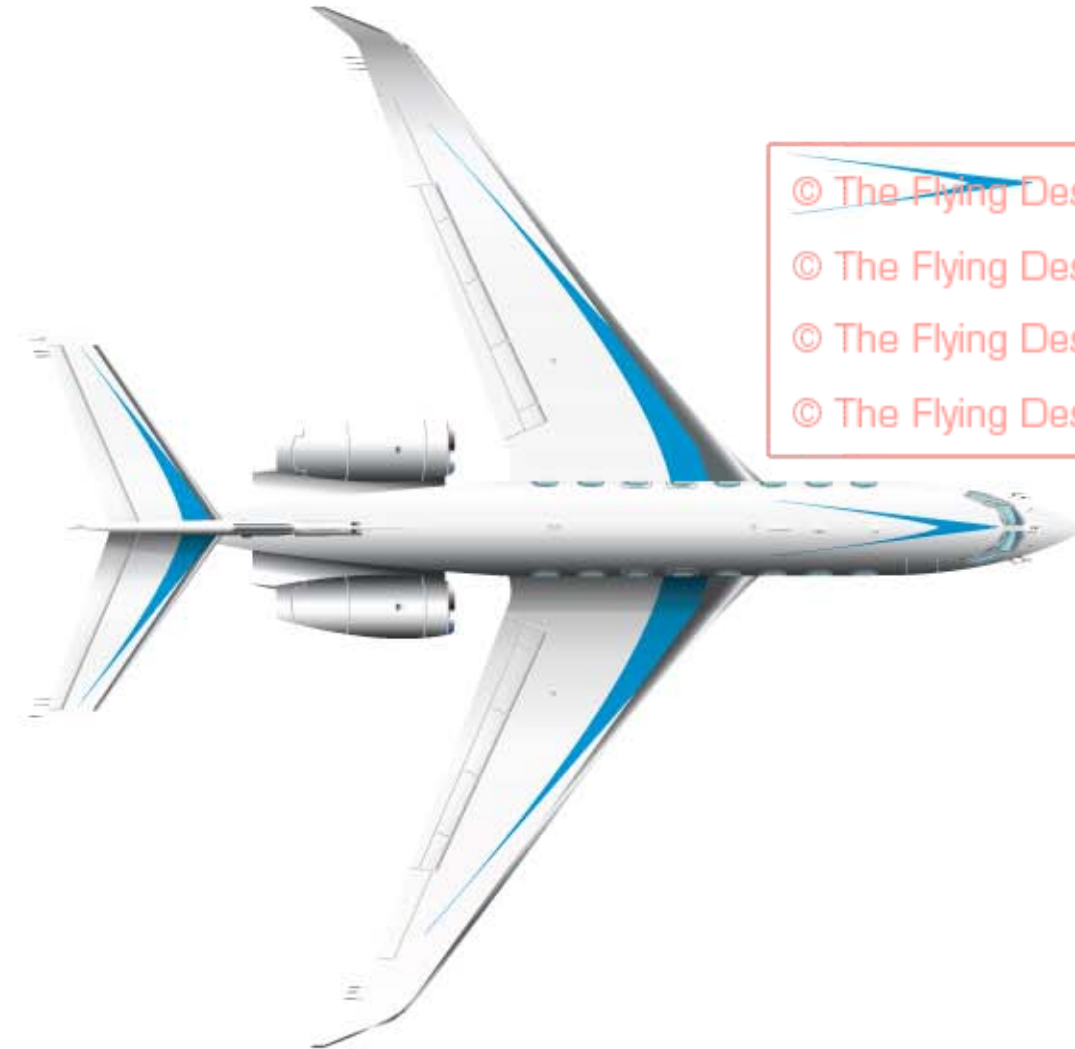

① All our models are in-house computerized and vector-based thus friendly-compliant with high quality paintjob processes.  
As seasoned designers working with certified EASA partners, we aim to anticipate best the technical,  
financial and schedule constraints of your project. As a result, you save time, you save money.
